

# Software & App Development Services

Technology Associates offers software development services that leverage development resources in both Canada and India. This unique setup enables your business to efficiently develop complex proprietary software solutions at a cost-effective rate.

Our software development services can be seamlessly integrated with other offerings from Technology Associates. This allows for a comprehensive end-to-end solution, encompassing ongoing support, hosting, and even level one and two helpdesk support for your custom software solution.

## Team Structure

At Technology Associates, you have the flexibility to engage either individual resources or full teams based on the specific requirements of your project. You can choose to self-manage the teams or opt for our skilled project managers to oversee and manage the team on your behalf. We offer a customizable approach to ensure your software development needs are met effectively.

## Cost Strucutre

We offer development resources on a flexible rate basis to accommodate your project timelines and budgetary constraints. Whether you require resources on a daily or monthly basis, we can tailor a rate table that aligns with your specific needs. Our goal is to provide you with the flexibility to manage your project efficiently while staying within your budgetary guidelines.

## Environments

With Technology Associates' Private Cloud hosting, you can harness the power of our Development, Testing, and Production environments for your software project, eliminating the need for you to maintain expensive infrastructure.

## Resources

- Project Managers
- IT Architects
- DBAs
- Developers
